

To whom it may concern : COMPANY PROFILE

Born in October 2001 as a consulting company, Effe-Effe s.r.l. became already in 2002 an import-export company; during the first difficult years the customer satisfaction (with ISO certification of the internal process since 2004) has been the glance used to penetrate the Italian market when the range of products was not adequate to the initial hope.

Then, step by step, its owner Fabrizio Fiorini, working in the pipelines field since beginning of 1990s, has been able to sign distribution agreements with well known European companies like Hawle, Canusa, PSI, Franken Plastik, Elmed, Uniones Arpol and Huwa; moreover Effe-Effe s.r.l. has started a new production line – in joint-venture with some small Italian manufacturers – including HDPE insulators for cased crossings and signaling/monitoring systems (tapes, meshes, ecc.) which have been becoming the new core business on foreign markets.

Thanks to the long experience in this particular field and to the open approach to the customer requests, Effe-Effe s.r.l. is actually able to propose itself worldwide as a possible commercial partner for companies already working on oil, gas, water and wastewater pipelines, interested in completing their “basket of products” with some accessories of high quality, granting the best technical support since the first proposal till the post-sales assistance at the jobsite.

Further detailed information concerning Effe-Effe s.r.l. products can be directly unloaded from the website www.effeefesrl.it.
